

International Reviews in Physical Chemistry:

Volume 15 Issue 1

Detector arrays in spectroscopy

Authors: K. Birkinshaw. Pages 13-40.

High pressure studies of the organic triplet

Authors: I.Y. Chan. Pages 41-52.

Charge transfer in collision of N₂⁺ and He

Authors: Y. Sun, H. R. Sadeghpour, K. Kirby, A. Dalgarno, G. P. Lafyatis. Pages 53-64.

Gateway-type intramolecular collisional transfer in ¹⁵NO

Authors: J. Heldt, C. Ottinger, A. F. Vilesov, T. Winkler, D. D. Xu. Pages 65-76.

Back to the hydrated electron - how it is produced and monitored at the dropping mercury electrode in pure water

Authors: M. Heyrovsky, F. Pucciarelli. Pages 77-92.

Electron impact ionization of C₆₀ and C₇₀: production and properties of parent and fragment ions studied with a two-sector field mass spectrometer

Authors: P. Scheier, B. Dünser, R. Wörgötter, S. Matt, D. Muigg, G. Senn, T. D. Märk. Pages 93-132.

Formation and decay of negative ion resonances in gaseous and condensed molecules

Authors: O. Ingolfsson, F. Weik, E. Illenberger. Pages 133-152.

The question of negative capacitance and its relation to instabilities and phase transitions at electrified interfaces

Authors: M.B. Partenskii, V. Dorman, P.C. Jordan. Pages 153-182.

Reactivity of gas-phase anions with fully halogenated alkanes

Authors: Robert A. Morris, A. A. Viggiano, J.F. Paulson. Pages 183-204.

Some properties of microcanonical rate constants

Authors: C.E. Klots. Pages 205-218.

Unusual kinetics of gas-phase proton transfer to Mn(CO)₅ and Re(CO)₅

Authors: A.E. Stevens Miller, T.M. Miller, G.K. Rekha, M. Menendez-Barreto, J.F. Friedman, J.F. Paulson. Pages 219-230.

Application of ion chemistry and the SIFT technique to the quantitative analysis of trace gases in air and on breath

Authors: D. Smith, P. Spänel. Pages 231-272.

A thermodynamic analysis of the first solvation shells of alkali and halide ions in liquid water and in the gas phase

Authors: E. Grunwald, C. Steel. Pages 273-282.

Rempi in a focusing RF-quadrupole: a new source for mass-, energy-,

and state-selected ions

Authors: S. Mark, T. Glenewinkel-Meyer, D. Gerlich.
Pages 283-298.

Dynamics of charge transfer and chemical reactions of doubly-charged ions at low collision energies

Authors: Z. Herman. Pages 299-324.

Statistical mechanics of pendular molecules

Authors: B. Friedrich, D. Herschbach. Pages 325-344.

Volume 15 Issue 2

Exploring molecular vibrational motions with periodic orbits

Authors: S. C. Farantos. Pages 345-374.

Dynamics of reactive collisions by optical methods

Authors: A. G. Ureña, R. Vetter. Pages 375-428.

One-electron resonances in electron scattering from polyatomic molecules

Authors: R. R. Lucchese, F. A. Gianturco. Pages 429-466.

The reduced potential curve (RPC) method and its applications

Authors: F. Jenc. Pages 467-524.

Volume 14 1995

Editor: D.C. Clary

Electron donor-acceptor couples

M.J. Ondrechen 1

Analysis of highly excited vibrational eigenstates

M.J. Davis 15

Multiphoton ionization and chemical dynamics

J.J. Belbruno 67

Fixed-node quantum Monte Carlo

J.B. Anderson 85

Electric dipole moments of pendular molecules

B. Friedrich 113

Searching for the simplest structural units to describe the three-dimensional structure of proteins

A. Perczel and I.G. Csizmadia 127

Quantum-chemical investigations of small molecular anions

P. Botschwina, S. Seeger, M. Mladenovic, B. Schultz, M. Horn, S. Schmatz, J. Flügge and R. Oswald 169

A new procedure for determining Lennard-Jones interaction parameters
F. Cuadros, A. Mulero, I. Cachadiña and W. Ahumada 205

Kinetics and dynamics of reactions in liquids
M. Ben-Nun and R.D. Levine 215

Orientational relaxation in dipolar systems: How much do we understand the role of correlations?
S. Ravichandran and B. Bagchi 271

Dynamics of persistent collision complexes in molecular beam reactive scattering
R. Grice 315

Orientation effects in electron transfer collisions
P.R. Brooks 327

Thermally induced reactions in solids: Isokinetic relationships of non-isothermal systems
S. Vyazoykin and W. Linert 355

Experimental measurements of state resolved, rotationally inelastic energy transfer
A. Schiffman and D.W. Chandler 371

Interstellar chemistry
D.R. Flower 421

Volume 13 1994

Editor: D.C. Clary

Cationic polymerization within clusters composed of unsaturated molecules
M.T. Coolbaugh, G. Vaidyanathan and J.F. Garvey 1

Effect of the surroundings on atomic and molecular properties
D.M. Bishop 21

Structure and dynamics of quantum clusters
K.B. Whaley 41

Novel quasi-aromatic transition metal cluster compounds
Jia-xi Lu and Zhi-da Chen 85

Molecular multiphoton transitions. Computational spectroscopy for perturbative and non-perturbative regimens
A.D. Bandrauk 123

Electron transfer reactions with buckminsterfullerene, C₆₀, in the gas

phase

D.K. Bohme 163

Coherent and incoherent laser control of photochemical reactions

M. Shapiro and P. Brumer 187

Spectroscopy of weakly-bound magnesium ion complexes

C.S. Yeh, J.S. Pilgrim, K.F. Willey, D.L. Robbins and M.A. Duncan 231

Variational transition state theory for activated chemical reactions in solution

B.C. Garrett and G.K. Schenter 263

Singlet-to-triplet energy transfer within metal-rare van der Waals complexes

W.H. Breckenridge 291

Classical path method in inelastic and reactive scattering

G.D. Billing 309

Kinetic calorimetry in the study of the mechanism of low-temperature chemical reactions

I.M. Barkalov and D.P. Kiryukhin 337

Vibrational energy transfer in fluids

D.W. Miller and S.A. Adelman 359

Volume 12 1993

Editor: D.C. Clary

The coupled equations problem of the quantum theory of atom-diatom reactive scattering

F. Mrugala 1

Light scattering in the study of colloidal and macromolecular systems

P. Johnson 61

Dielectric studies under pressure on plastic and liquid crystals

A. Würflinger 89

Controlling the quantum numbers in chemical reactions. Reactivity and energy transfer and highly vibrational excited molecules

X. Yang and A.M. Wodtke 123

Dynamics and structure of aromatic molecular van der Waals complexes

M.R. Topp 149

Rotational line intensities in zero kinetic energy photoelectron spectroscopy (ZEKE-PES)

F. Merkt and T.P. Sortly 205

Density-functional studies of electronic properties of polymers
M. Springborg 241

Infrared emission studies of the vibrational deactivation of benzene derivatives
J.R. Barker and B.M. Toselli 305

Multireference coupled cluster method for the electronic structure of molecules
N. Oliphant and L. Adamowicz 339

Experimental characterization and computational simulation of chemical reaction dynamics. A case study
P.M. Aker and J.J. Valentini 363

Volume 11 1992

Editor: D.C. Clary

Tunnelling of heavy particles in the low temperature chemistry
V.A. Benderskii and V.I. Goldanskii 1

Vibronic transitions in rare earth spectroscopy
G. Blasse 71

Sticking of molecular hydrogen on simple, noble and transition metal surfaces
A. Winkler and K.D. Rendulic 101

Delay effects and differential delay equations in chemical kinetics
I.P. Epstein 135

Transport cross-sections for polyatomic gases
V. Vesovic and W.A. Wakeham 161

Spin-forbidden chemistry within the Breit-Pauli approximation
D.R. Yarkony 193

Measuring aromaticity
Zhongxiang Zhou 243

Chemical reactions in the process of matrix devitrification
I.M. Barkalov and D.P. Kiryukhin 263

Light-induced kinetic effects in molecular gases
L.J.F. Hermans 289

Grid methods for solving the Schrödinger equation and time dependent quantum dynamics of molecular photofragmentation and reactive scattering processes
G.G. Balint-Kurti, R.N. Dixon and C. Clay Marston 317

The effect of tetrahedral substitution of Si by Al on the surface acidity of

the oxygen plane of clay minerals

S. Yariv 345

Volume 10 1991

Editor: D.C. Clary

Theory of chemical bonding based on the atom-homogeneous electron gas system

T.J. Raeker and A.E. De Pristo 1

The chemistry of meteoric metals in the earth's upper atmosphere

J.M.C. Plane 55

Classical trajectory calculations on gas-phase reactive collisions

H.R. Mayne 107

What are the basic mechanisms of electronic transitions in molecular dynamic processes

H. Nakamura 123

(H₂O)₂: spectroscopy, structure and dynamics

G.T. Fraser 189

Underpotential deposition of metals on foreign metal substrates

S. Szarbó 207

Role of angular momentum in statistical unimolecular rate theory

E.A. Aubanel, D.M. Wardlaw, Ling Zhu and W.L. Hase 249

Quantum beat spectroscopy

E. Hack and J.R. Huber 287

Theory of collisional energy transfer of highly excited molecules

R.G. Gilbert 319

Molecular, multiresonant coherent four-wave mixing spectroscopy

J.C. Wright, R.J. Carlson, G.B. Hurst, J.K. Steehler, M.T. Riebe, B.B. Price, D.C. Nguyen and S.H. Lee 349

A model system for the study of structure and dynamics of molecules on surfaces: CO on NaCl(100)

G.E. Ewing 391

Volume 9 1990

Editors: A.D. Buckingham, J.M. Thomas, B.A. Thrush, M.A. El-Sayed, and S. Nagakura

Variational and perturbative descriptions of highly vibrationally excited

molecules

E.L. Sibert III 1

Vibrational spectra and point defect activities of icy solids and gas phase clusters

J.P. Devlin 29

Time Resolved infrared-ultraviolet double resonance spectroscopy of formaldehyde-d₂

B.J. Orr 67

Periodic trends in the reactions of atomic ions with molecular hydrogen

P.B. Armentrout 115

Theoretical study of the bonding in molecular transition-metal cations

C.W. Bauschlicher and S.R. Langhoff 149

Cross-beam investigations of state-resolved collision dynamics of simple radicals

Kopin Liu, R.G. Macdonald and A.F. Wagner 187

Bent bonds probed by ligand-field analysis

M.J. Duer, N.D. Fenton and M. Gerloch 227

Spectroscopic characterization of cations via their electronic transitions

J.P. Maier 281

Location control of electron donors and acceptors in photoinduced charge separation across surfactant surfaces

L. Kevan 307

Reactions of alkyl radicals

M.J. Pilling and V.K. Proudler 329

Conformational stability of the haloacetyl halides

J.R. Durig, Ai Ying Wang and T.S. Little 349

Volume 8 1989

Editors: A.D. Buckingham, J.M. Thomas, B.A. Thrush, M.A. El-Sayed, and S. Nagakura

Modification of catalysts

L. Ya. Margolis 1

Transition metal dioxygen complexes as intermediates in homogeneous catalytic oxidations

L.I. Simandi 21

Pressure-induced molecular rearrangements in the solid state

H.G. Drickamer and K.L. Bray 41

The anionic group theory of the non-linear optical effect and it's

applications in the development of new high quality NLO crystals in the borate series

Chuangtian Chen, Yicheng Wu and Rukang Li 65

Editorial 93

Organic semiconductors, conductors and superconductors

Hiroo Inokuchi 95

Structures and functions of proteins and nucleic acids in protein biosynthesis

Tatsuo Miyazawa and Shigeyuki Yokoyama 125

Two-colour dip spectroscopy of jet-cooled molecules

Mitsuo Ito 147

Transient molecules, free radicals and molecular ions, investigated by high-resolution spectroscopy

Eizi Hirota 171

Structural studies on catalysis and solid surfaces

Haruo Kuroda and Yashuhiro Iwasawa 207

Structural studies on transition metal compounds

Yoshihiko Saito 235

The calculation of vibrational energy levels by semiclassical and quantum methodology: a review

N.C. Handy 275

Synchrotron X-ray diffraction studies of inorganic materials and heterogeneous catalysts

J.M. Newsam and K.S. Lang 289

Molecular quantum electrodynamics in chemical physics

D.L. Andrews, D.P. Craig and T. Thrunamachandran 339

Volume 7 1988

Editors: A.D. Buckingham, J.M. Thomas, B.A. Thrush, M.A. El-Sayed, and S. Nagakura

Dynamical coupling and energy transfer in weakly bound molecular complexes

F.A. Gianturco, G. Delgado-Barrio, O. Roncero and P. Villarreal 1

Vibrational relaxation in molecular crystals

S. Califano and V. Schettino 19

New methods of probing the structure of catalysts

C. Williams, S. Yashonath and J.M. Thomas 81

Fluorescence probing in aqueous micellar systems: an overview

A. Malliaris 95

Solution chemistry in silicon

G.F. Cerofolini and L. Meda 123

Photochemistry at structured surfaces: a classical electromagnetic approach
