

Guidelines for Authors

Submission of manuscripts: Please send your manuscript electronically to michael.osuch@tandf.co.uk retaining a copy for your reference. Comments to the Editor should also be sent to this address. The manuscript should clearly designate one author as correspondent to whom proofs will also be sent, and the full postal address, email address, telephone and fax numbers of this individual should be given.

Copyright: It is a condition of the publication that authors vest or license copyright in their articles, including abstracts, in Taylor & Francis Group Ltd. This enables us to ensure full copyright protection and to disseminate the article, and the journal, to the widest possible readership in print and electronic formats as appropriate. Authors may, of course, use the material elsewhere after publication providing that prior permission is obtained from Taylor & Francis Group Ltd.

Ethical review: The Editor and Publishers support the principles of the Declaration of Helsinki, and expect that the authors of papers submitted to the Journal will have obtained ethical consent and followed those legal and regulatory requirements for human experimentation with drugs, including informed consent, according to procedures which apply in their institution and country.

Authority and responsibility: The intellectual content of the paper is the responsibility of the authors. The Editor and the Publishers accept no responsibility for opinions and statements of authors. While every effort will be made by the Editor and Publishers to avoid inaccurate and misleading data, they accept no liability whatsoever for the consequences of wrong information. The authors undertake to keep the Editor and the Publishers fully and effectually indemnified against any liability or claims that may arise out of the publication of inaccurate and/or misleading data.

Review articles: Review articles are solicited by the Editors, but unsolicited reviews will also be strongly considered. Reviews of at least 6–10 pages double-spaced would be appropriate and may be preferred as we believe that pictures not prose and tables not text provide a better template by which concepts can best be communicated to our readers in a bold, visual and concise manner. At a maximum we would wish to have no more than 4600 words of text which encompasses approximately 18 double-spaced typed pages. We would like to focus on cutting edge subjects or controversial areas that are of broad interest to the readers. Tables are an excellent means of summarizing previous literature, and we would recommend the use of summary tables whenever possible to compile the previous literature in an easy to understand and quickly readable format. These tables should be titled and cited in numerical order in the text using Roman numbers, and should be typed double-spaced on separate pages. All decimal points should be aligned as possible. Data in tables is best separated by tabs. Use of the word processor's table features is discouraged due to lack of compatibility with other programs.

Remember that these review pieces are original articles and should not simply recapitulate the current data, but rather organize previous data in a meaningful way and discuss the relative strengths and weaknesses of previous studies.

Illustrations: An illustrations (including photographs, graphs and diagrams) should be referred to as Figures and their position indicated in the text (e.g. Figure 3). Each should be submitted on a separate sheet of paper, numbered on the back with Figure number (Arabic numerals) and the title of the paper. The captions of all figures should be submitted on a separate sheet, should include keys to symbols, and should make interpretation possible without reference to the text. Figures should ideally be professionally drawn and designed with the format of the journal in mind and should be capable of reduction.

Colour Figures: Any figure submitted as a colour original will appear in colour in the journal's online edition free of charge and can be downloaded. Paper copy colour reproduction will only be considered on condition that authors contribute to the associated costs. Charges are: £500/US\$900 for the first colour page and £250/US\$450 for each colour page after per article. (Colour costs will be waived for invited Review Articles)

Literature cited: References should follow the CBE Citation & Sequence format. Only works actually cited in the text should be included in the references. Indicate in the text with arabic numbers inside square brackets. Spelling in the reference list should follow the original. References should then be listed in numerical order at the end of the article. Examples are provided as follows:

Journal article:

1. Steiner U, Klein J, Eiser E, Budkowski A, Fetters LJ. Complete wetting from polymer mixture. *Science* 1992;258:1122–1129.

Book chapter:

2. Kuret JA, Murad F. Adenohypophyseal hormones and related substances. In: Gilman AG, Rall TW, Nies AS, Taylor P, editors. *The pharmacological basis of therapeutics*. 8th ed. New York: Pergamon; 1990. pp 1334–1360.

Conference proceedings:

3. Irvin AD, Cunningham MP, Young AS, editors. *Advances in the control of Theileriosis*. International Conference held at the International Laboratory for Research on Animal Disease; 1981 Feb 9–13; Nairobi. Boston: Martinus Nijhoff Publishers; 1981. 427 p.

Dissertations or Thesis:

4. Mangie ED. *A comparative study of the perceptions of illness in New Kingdom Egypt and Mesopotamia of the early first millennium [dissertation]*. Akron (OH): University of Akron; 1991. 160 p. Available from: University Microfilms, Ann Arbor MI; AAG9203425.

Journal article on internet:

5. Loker WM. "Campesinos" and the crisis of modernization in Latin America. *Jour of Pol Ecol* [serial online] 1996; 3(1). Available: http://www.library.arizona.edu/ej/jpe/volume_3/ascii-lokeriso.txt via the INTERNET. Accessed 1996 Aug 11.

Webpage:

6. *British Medical Journal* [Internet]. Stanford, CA: Stanford Univ; 2004 July 10 - [cited 2004 Aug 12]; Available from: <http://bmj.journals.com/>

Internet databases:

7. *Prevention News Update Database* [Internet]. Rockville (MD): Centers for Disease Control and Prevention (US), National Prevention Information

Network. 1988 Jun - [cited 2001 Apr 12]. Available from: <http://www.cdcnpin.org/db/public/dnmain.htm>

Further examples and information can be found in the CBE style manual *Scientific Style and Format*, sixth edition.

Acknowledgements: The scientific and material contributions of others to the work should be acknowledged. Any grant supports should be listed and permission for reproduction of published material acknowledged.

Proofs: Proofs will be sent by email to the author nominated for correspondence. Proofs are supplied for checking and making essential typographical corrections, not for general revision or alteration. Proofs must be returned (by mail or fax) within 48 hours of receipt.

Early Electronic Offprints: Corresponding authors can now receive their article by email as a complete PDF. This allows the author to print up to 50 copies, free of charge, and disseminate them to colleagues. In many cases this facility will be available up to two weeks prior to publication. Alternatively, corresponding authors may receive 50 print offprints. A copy of the journal will be sent by post to all corresponding authors after publication. Additional copies of the journal can be purchased at the author's preferential rate of £15.00/\$25.00 per copy.
