About the journal
International Journal of Radiation Biology is an international, peer-reviewed journal publishing high-quality, original research. Please see the journal’s Aims & Scope for information about its focus.
Please note that this journal only publishes manuscripts in English.

*International Journal of Radiation Biology* accepts the following types of article: Original Manuscripts, Rapid Communications, Technical Reports, Reviews, Mini Reviews, Meeting Reports and Letters to the Editor.

*Original Submissions* should follow general submission guidelines (see Preparing your paper)

*Rapid Communications* are short topical papers of wide interest to the readership of the journal. Submission guidelines are the same as for Original Manuscripts (see below) except it is limited to 2500 words (excluding references) a maximum of 20 references and 4 tables/figures. Please note that each figure or table is limited to four panels. The timeline for the review of these manuscripts will be short.

*Technical Reports* describe instrumentation or programming for applications in areas of focus of the journal. Submission guidelines are the same as for Original Manuscripts except they may have a modified abstract of only Purpose, Methods and Conclusion.

*Reviews* represent a comprehensive discussion of a topic of interest to the readers. Submission guidelines are the same as for Original Manuscripts except they may have a modified abstract of only Purpose and Conclusion.

*Mini Reviews* focus on a specific aspect of a topic of interest. Submission guidelines are the same as for Reviews with a 3500 word limit.

*Meeting Reports* cover a recent meeting of interest to readers of the journal. Submission guidelines are the same as for Original Manuscripts with a 3500 word limit.

*Letters to the Editor* are addressed to the Editor and refer to an article that was published in the journal within the previous six months or addresses a specific topic of interest to reader in the journal

*Book Reviews* are invited and/or solicited by the Editors and are limited to 1000 words.

**Peer review**

Taylor & Francis is committed to peer-review integrity and upholding the highest standards of review. Once your paper has been assessed for suitability by the editor, it will then be single-blind peer-reviewed by independent, anonymous expert referees. Find out more about what to expect during peer review and read our guidance on publishing ethics.

**Preparing your paper**

All authors submitting to medicine, biomedicine, health sciences, allied and public health journals should conform to the *Uniform Requirements for Manuscripts Submitted to Biomedical Journals,* prepared by the International Committee of Medical Journal Editors (ICMJE).
Structure
Your paper should be compiled in the following order: title page; abstract; keywords; main text, including introduction, materials and methods, results and discussion; acknowledgments; declaration of interest statement; references; appendices (as appropriate); table(s) with caption(s) (on individual pages); figures (including captions); figure captions (as a list).

For a review paper of 10 or more pages in length please include a table of contents, with all major headings and subheadings included in the text.

Word count
Please include a word count for your paper. Please note that although original manuscripts do not have word count limitations, a word count should still be included upon submission.

Style guidelines
Please refer to these quick style guidelines when preparing your paper, rather than any published articles or a sample copy.

Please choose American or British spelling style consistently throughout your manuscript.

Please use single quotation marks, except where ‘a quotation is “within” a quotation’. Please note that long quotations should be indented without quotation marks.

Formatting and templates
Papers may be submitted in any standard format, preferably in Word. Figures should be saved separately from the text.

Word templates are available for this journal. Please save the template to your hard drive, ready for use.

If you are not able to use the template via the links (or if you have any other template queries) please contact authortemplate@tandf.co.uk.

References
Please use this reference guide when preparing your paper. An EndNote output style is also available to assist you.

Checklist: what to include
1. Author details. Please ensure everyone meeting the International Committee of Medical Journal Editors (ICJME) requirements for authorship is included as an author of your paper. Please include all authors’ full names, affiliations, postal addresses, telephone numbers and email addresses on the cover page. Where available, please also include ORCIDs and social media handles (Facebook, Twitter or LinkedIn). One author will need to be identified as the corresponding author, with their email address normally displayed in the article PDF (depending on the journal) and the online article. Authors’ affiliations are the affiliations where the research was conducted. If any of the named co-authors moves affiliation during
the peer-review process, the new affiliation can be given as a footnote. Please note that no changes to affiliation can be made after your paper is accepted. Read more on authorship.

2. A structured abstract of 250 words. A structured abstract should include headings and cover (in the following order) the purpose of the article, its materials and methods (the experimental system and procedures used), the results and conclusions. Read tips on writing your abstract. For review papers, the abstract should cover the purpose and the conclusion.

3. Graphical abstract. This is an image to give readers a clear idea of the content of your article. It should be a maximum width of 525 pixels. If your image is narrower than 525 pixels, please place it on a white background 525 pixels wide to ensure the dimensions are maintained. Save the graphical abstract as a .jpg, .png, or .gif. Please do not embed it in the manuscript file but save it as a separate file, labelled GraphicalAbstract1.

4. You can opt to include a video abstract with your article. Find out how these can help your work reach a wider audience, and what to think about when filming.

5. 3-6 keywords. Read making your article more discoverable, including information on choosing a title and search engine optimization.

6. Funding details. Please supply all details required by your funding and grant-awarding bodies as follows:
   For single agency grants
   This work was supported by the <Funding Agency> under Grant <number xxxx>.
   For multiple agency grants
   This work was supported by the <Funding Agency #1> under Grant <number xxxx>; <Funding Agency #2> under Grant <number xxxx>; and <Funding Agency #3> under Grant <number xxxx>.

7. Disclosure statement. This is to acknowledge any financial interest or benefit that has arisen from the direct applications of your research. Further guidance on what is a conflict of interest and how to disclose it.

8. Biographical note. Please supply a short biographical note for each author. This could be adapted from your departmental website or academic networking profile and should be relatively brief (e.g. no more than 50 words).

9. Geolocation information. Submitting a geolocation information section, as a separate paragraph before your acknowledgements, means we can index your paper’s study area accurately in JournalMap’s geographic literature database and make your article more discoverable to others. More information.

10. Supplemental online material. Supplemental material can be a video, dataset, fileset, sound file or anything which supports (and is pertinent to) your paper. We publish supplemental material online via Figshare. Find out more about supplemental material and how to submit it with your article.

11. Figures. Figures should be high quality (1200 dpi for line art, 600 dpi for grayscale and 300 dpi for colour). Figures should be saved as TIFF, PostScript or EPS files.
12. Tables. Tables should present new information rather than duplicating what is in the text. Readers should be able to interpret the table without reference to the text. Please supply editable files.

13. Equations. If you are submitting your manuscript as a Word document, please ensure that equations are editable. More information about mathematical symbols and equations.

14. Units. Please use SI units (non-italicized).

Using third-party material in your paper
If you wish to include any material in your paper for which you do not hold copyright, you will need to obtain written permission from the copyright owner prior to submission. More information on requesting permission to reproduce work(s) under copyright.

Declaration of interest
Please include a declaration of interest statement, using the subheading “Declaration of interest.” If you have no interests to declare, please state this (suggested wording: The authors report no declarations of interest). For all NIH/Wellcome-funded papers, the grant number(s) must be included in the declaration of interest statement. Read more on declaring conflicts of interest.

Clinical Trials Registry
In order to be published in a Taylor & Francis journal, all clinical trials must have been registered in a public repository at the beginning of the research process (prior to patient enrolment). Trial registration numbers should be included in the abstract, with full details in the methods section. The registry should be publicly accessible (at no charge), open to all prospective registrants, and managed by a not-for-profit organization. For a list of registries that meet these requirements, please visit the WHO International Clinical Trials Registry Platform (ICTRP). The registration of all clinical trials facilitates the sharing of information among clinicians, researchers, and patients, enhances public confidence in research, and is in accordance with the ICMJE guidelines.

Complying with ethics of experimentation
Please ensure that all research reported in submitted papers has been conducted in an ethical and responsible manner, and is in full compliance with all relevant codes of experimentation and legislation. All papers which report in vivo experiments or clinical trials on humans or animals must include a written statement in the Methods section. This should explain that all work was conducted with the formal approval of the local human subject or animal care committees (institutional and national), and that clinical trials have been registered as legislation requires. Authors who do not have formal ethics review committees should include a statement that their study follows the principles of the Declaration of Helsinki.

Consent
All authors are required to follow the ICMJE requirements on privacy and informed consent from patients and study participants. Please confirm that any patient, service user, or participant (or that person’s parent or legal guardian) in any research, experiment, or clinical trial described in your paper has given written consent to the inclusion of material pertaining to themselves, that they
acknowledge that they cannot be identified via the paper; and that you have fully anonymized them. Where someone is deceased, please ensure you have written consent from the family or estate. Authors may use this Patient Consent Form, which should be completed, saved, and sent to the journal if requested.

**Health and safety**

Please confirm that all mandatory laboratory health and safety procedures have been complied with in the course of conducting any experimental work reported in your paper. Please ensure your paper contains all appropriate warnings on any hazards that may be involved in carrying out the experiments or procedures you have described, or that may be involved in instructions, materials, or formulae.

Please include all relevant safety precautions; and cite any accepted standard or code of practice. Authors working in animal science may find it useful to consult the International Association of Veterinary Editors’ Consensus Author Guidelines on Animal Ethics and Welfare and Guidelines for the Treatment of Animals in Behavioural Research and Teaching. When a product has not yet been approved by an appropriate regulatory body for the use described in your paper, please specify this, or that the product is still investigational.

**Submitting your paper**

This journal uses ScholarOne Manuscripts to manage the peer-review process. If you haven't submitted a paper to this journal before, you will need to create an account in ScholarOne http://mc.manuscriptcentral.com/ijrb. Please read the guidelines above and then submit your paper in the Author Centre, where you will find user guides and a helpdesk.

Please note that International Journal of Radiation Biology uses CrossCheck™ to screen papers for unoriginal material. By submitting your paper to International Journal of Radiation Biology you are agreeing to originality checks during the peer-review and production processes.

**Publication charges**

There are no submission fees or page charges for this journal.

Colour figures will be reproduced in colour in your online article free of charge. If it is necessary for the figures to be reproduced in colour in the print version, a charge will apply.

Charges for colour figures in print are £250 per figure ($395 US Dollars; $385 Australian Dollars; 315 Euros). For more than 4 colour figures, figures 5 and above will be charged at £50 per figure ($80 US Dollars; $75 Australian Dollars; 63 Euros). Depending on your location, these charges may be subject to Value Added Tax.

**Fast Track publication**

All publications in International Journal of Radiation Biology are driven entirely by editorial considerations and independent peer review. As part of the journal’s responsive approach to the publication of timely research results, International Journal of Radiation Biology offers an optional,
prioritized Fast Track publication.

Articles are published online within 5–7 weeks after submission (subject to 1–2-week author revision following initial peer review, prompt turnaround of proofs, and acceptance of the article). There is a publication support fee for this service, based on a charge of $850/€625/£550 per published page (there are on average 700 words per published page).

Opting for the Fast Track service will in no way influence the quality of the peer review or the editorial decision. Fast Track articles will undergo a peer-review process of the same standard as regular articles submitted to *International Journal of Radiation Biology*.

If you would like to discuss or select Fast Track publication, please contact the Managing Editor <Email address of Managing Editor> before, or on the day of, submission.

**Copyright options**

Copyright allows you to protect your original material, and stop others from using your work without your permission. Taylor & Francis offers a number of different license options. [Read more on publishing agreements.](#)

**Complying with funding agencies**

We will deposit all National Institutes of Health or Wellcome Trust-funded papers into PubMedCentral on behalf of authors, meeting the requirements of their respective open access (OA) policies. If this applies to you, please tell our production team when you receive your article proofs, so we can do this for you. Check funders’ OA policy mandates [here](#). Find out more about [sharing your work](#).

**Open access**

This journal is compliant with the Research Councils UK OA policy, and gives authors the option to publish open access via our [Open Select publishing program](#), making it free to access online immediately on publication.

Taylor & Francis Open Select gives you, your institution or funder the option of paying an article publishing charge (APC) to make an article open access. Please contact [openaccess@tandf.co.uk](mailto:openaccess@tandf.co.uk) if you would like to find out more, or go to our [Author Services website](#).

For more information on license options, embargo periods and APCs for this journal please go [here](#). You can also check our page on [open access funder policy and mandates](#).

**Accepted Manuscripts Online (AMO)**

This journal publishes manuscripts online as rapidly as possible, as a PDF of the final, accepted (but unedited and uncorrected) paper. This is clearly identified as an unedited manuscript and is referred to as the Accepted Manuscript Online (AMO). No changes will be made to the content of the original paper for the AMO version but, after copy-editing, typesetting, and review of the
resulting proof, the final corrected version (the Version of Record [VoR]), will be published, replacing the AMO version.

The VoR is the article version that will appear in an issue of the journal. Both the AMO version and VoR can be cited using the same DOI (digital object identifier). To ensure rapid publication, we ask you to return your signed publishing agreement as quickly as possible, and return corrections within 48 hours of receiving your proofs.

**My Authored Works**

On publication, you will be able to view, download and check your article’s metrics (downloads, citations and Altmetric data) via [My Authored Works](#) on Taylor & Francis Online. This is where you can access every article you have published with us, as well as your free eprints link, so you can quickly and easily share your work with friends and colleagues.

We are committed to promoting and increasing the visibility of your article. Here are some tips and ideas on how you can work with us to promote your research.

**Article reprints**

For enquiries about reprints, please contact the Taylor & Francis Author Services team at reprints@tandf.co.uk. To order a copy of the issue containing your article, please contact our Customer Services team at Adhoc@tandf.co.uk.
