## 1. How to cite references in your text.

References are given in the text by bracketed numbers [1], with list of references at the end of the article in numerical order.

See [11,12].

See, for example, [1,3,10–13,15–20,22–25,27,28].

For some work along these lines, see [3,13,17,18,27].

## 2. How to format the references

References are listed at the end of the article in numerical order. The styles for journal publications, books, and on-line articles or software are outlined below.

### 2.1. Journal articles

#### *Journal title*

Abbreviate the journal title as shown in the list available at <http://www.ams.org/msnhtml/serials.pdf>

### 2.2. Books

Italicize book titles and capitalize first letter of main words in title.
