Enclose a self-addressed postcard for the editor to return as acknowledgement of manuscript receipt.

Authors must supply electronic files for manuscript submissions. All text files should be prepared using MS Word and disks should be clearly labeled with the authors' names, file name, and software program. A hardcopy printout that exactly matches the disk must be supplied. Each manuscript must be accompanied by a statement that it has not been published elsewhere and that it has not been submitted simultaneously for publication elsewhere. Authors are responsible for obtaining permission to reproduce copyrighted material from other sources and are required to sign an agreement for the transfer of copyright to the publisher. All accepted manuscripts, artwork, and photographs become the property of the publisher.

All parts of the manuscript should be typewritten, double-spaced, with margins of at least one inch on all sides. Number manuscript pages consecutively throughout the paper. Authors should also supply a shortened version of the title suitable for the running head, not exceeding 50 character spaces. Each article should be summarized in an abstract of no more than 100 words. Avoid abbreviations, diagrams, and reference to the text. Authors must supply full contact information and updates up to the time of publication.

## Illustrations

Illustrations submitted (line drawings, halftones, photos, photomicrographs, etc.) should be clean originals or digital files. Digital files are recommended for highest quality reproduction and should follow these guidelines:

- 300 dpi or higher
- sized to fit on journal page
- EPS, TIFF, or PSD format only
- submitted as separate files, not embedded in text files

Color illustrations will be considered for publication; however, the author will be required to bear the full cost involved in their printing and publication. The charge for the page with color is \$900.00. The next three pages with color are \$450.00. A custom quote will be provided for color art totaling more than 4 journal pages. Good quality color prints should be provided in their final size. The publisher has the right to refuse publication of any artwork deemed unacceptable.

## Tables and Figures

Tables and figures should not be embedded in the text, but should be included as files. A short descriptive title should appear above each table with a clear legend and any footnotes suitably identified below. All units must be included. Figures should be completely labeled, taking into account necessary size reduction. Captions should be typed, double-spaced. All original figures should be clearly marked in pencil on the reverse side with the number, author's name, and top edge indicated.

## Page Charges

Part of the publication cost of Ultrastructural Pathology is covered by a voluntary page charge of \$43.50 per printed page. If these charges are paid, the author will receive 50 reprints of the article. The acceptance and publication of papers are not dependent on the payment of these charges.

## Proofs and Author's Alterations

Page proofs are sent to the designated author. They must be carefully checked and returned within 48 hours of receipt in order to avoid publication delay. Only minor corrections against the manuscript can be allowed.
