Bioremediation Journal

Editor-in-Chief: Hanadi S. Rifai

University of Houston

rifai@uh.edu

About the Journal

Bioremediation Journal is a quarterly, peer-reviewed publication that provides an abundance of field and laboratory-proven strategies for the economical use of biological and supporting physical treatments. The journal features the latest information needed to stay ahead of the constantly changing technical and regulatory challenges in the field, keeping readers abreast of new developments in bioremediation of contaminated soils and groundwater. Also included are extensive, up-to-date accounts on all the latest techniques and strategies for bioremediation in a range of agricultural and urban environments.

Each edition of ***Bioremediation Journal*** delivers the very latest views from leading researchers and practitioners around the globe. Articles focus on both in-site and onsite case histories in temperate, tropical and cold region applications. Vital information related to in-well, aquifer, soil, and marine environments is discussed in detail.

Submission of Manuscripts

Bioremediation Journal receives all manuscript submissions electronically via their Manuscript Central website located at: <http://mc.manuscriptcentral.com/BBRM>.

Manuscript Central allows for rapid submission of original and revised manuscripts, as well as facilitating the review process and internal communication between authors, editors and reviewers via a web-based platform. For Manuscript Central technical support, you may contact by e-mail or phone support via <http://mcv3support.custhelp.com/>. If you have any other requests please contact the Editor-in-Chief, Hanadi S. Rifai at bioremj@uh.edu
