## Call for Papers: Global Society

### Journal of Interdisciplinary International Relations

**Editor-in-Chief:** Doug Stokes, *The University of Kent, UK*

**Associate Editors:** Andrea Den Boer & Florian Bieber, *The University of Kent, UK*

**Global Society** covers the new agenda in global and international relations and encourages innovative approaches to the study of global and international issues from a range of disciplines. It promotes the analysis of transactions at multiple levels, and in particular, the way in which these transactions blur the distinction between the sub-national, national, transnational, international and global levels.

An ever integrating global society raises a number of issues for global and international relations which do not fit comfortably within established 'Paradigms'. Among these are the international and global consequences of nationalism and struggles for identity, migration, racism, religious fundamentalism, terrorism and criminal activities, famines, genocides, the spread of contagious disease and pestilence, and environmental degradation.

Similarly, the globalisation of normative superstructures, such as of liberal capitalism, or of communications, such as the Internet, influences transactions at all levels and challenges state controls, for instance overflows of capital and of information.

#### Submission Procedure:

Submissions should be made via the journal's Manuscript Central site: <http://mc.manuscriptcentral.com/cgsj>

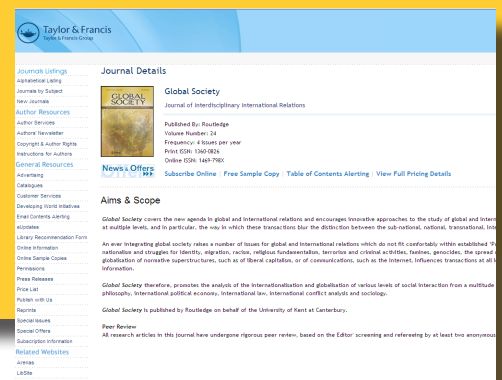

Once logged in, authors can submit manuscripts through their Author Centre.

#### Format of Manuscripts:

Manuscripts should be saved in A4 format in double-spacing, and should normally be between 8–10,000 words in length. Abstracts of no more than 200 words are required for all submissions.

For further instructions on submissions, visit the journal homepage:
