

# Virtual and Physical Prototyping

## CALL FOR PAPERS

Endorsed by the  
Global Alliance of  
Rapid Prototyping  
Associations

Launched in 2006, *Virtual and Physical Prototyping* aims to provide an international forum for professionals and academics to exchange novel ideas and disseminate knowledge covering the full range of activities related to virtual and rapid prototyping. Papers are reviewed by a minimum of two reviewers, at the discretion of the Editors-in-Chief.

The Journal publishes cutting-edge research in the multi-disciplinary area of virtual and rapid prototyping. Areas of focus include, but are not limited to:

- CAD and 3D data acquisition technologies: fast geometrical modelling schemes, 3D digitising, X-ray tomography, photogrammetry, image-based modelling systems
- Virtual environments: virtual engineering and manufacturing, virtual enterprise engineering, Internet-based product development, rapid prototyping simulation and optimisation, new methods for virtual prototyping
- Rapid prototyping: advances in rapid prototyping technologies, bio-inspired routes for novel bio-manufacturing strategies, computer modelling of rapid prototyping
- Rapid tooling and manufacturing: advances on material removal and addition technologies, research on new rapid prototyping technologies, micromachining, nanofabrication, high speed machine technology, small batch production methods, systems for the direct manufacturing of metallic and ceramic components
- Advanced rapid prototyping materials, biomaterials for medical applications
- Concurrent engineering: concurrent engineering in virtual environment, frameworks for information sharing, collaborative decision-making in concurrent engineering, concurrent design and manufacture

### Submissions

Authors are encouraged to submit manuscripts electronically. Electronic submissions should be sent as email attachments using a standard word processing program, such as MSWORD or PDF. Papers for consideration should be sent to one of the Editors-in-Chief:

Professor Dr Paulo Jorge Bartolo  
Polytechnic Institute of Leiria, Portugal  
e-mail: [pbartolo@estg.ipleiria.pt](mailto:pbartolo@estg.ipleiria.pt)

Professor Dr Chee Kai Chua  
Nanyang Technological University, Singapore  
e-mail: [MCKCHUA@ntu.edu.sg](mailto:MCKCHUA@ntu.edu.sg)

For full instructions for authors, including Word and LaTeX style guides for manuscript preparation, please go to [www.tandf.co.uk/journals/ifa.asp](http://www.tandf.co.uk/journals/ifa.asp) and click on the journal name.

**COMING SOON...** online submission via Manuscript Central™, the publishing industry's number one online tool for managing manuscripts through the peer review process.
