

Journal of Natural Resources Policy Research

Call for Papers

Journal of Natural Resources Policy Research
new to Routledge in 2009 .

Journal of Natural Resources Policy Research
publishes original policy-oriented papers addressing a broad
range of natural resource fields including water, minerals, energy,
fisheries, and forestry in a synthesizing fashion, rather than as
stand-alone speciality areas.

**Our goal is to foster productive dialog among the disparate sectors in the
broad field of natural resources and among various social science
perspectives leading to an improved understanding of institutional and
economic dynamics and informed policy making.**

Submission

Submit all manuscripts electronically,
if at all possible, to
jonrpr@gmail.com. If electronic
submission is not possible, please
mail three hardcopies of your paper,
with a disk in Microsoft Word in PC
format

**Coming soon Online Submission
via Manuscript Central**

All papers published will be subject
to editorial screening and compre-
hensive peer review at the discretion
of the Editor

The journal will be a largely social-sciences-focused
journal including such fields as economics,
sociology, geography, political science,
anthropology, public administration, ethics and
other disciplines relevant to the crafting of
efficient, equitable and sustainable natural
resources policies. Also, disciplines that may be
conventionally outside the social sciences field,
such as planning, management and law, which
have relevance to natural resources policy
formulation, will be included. Natural and physical
scientists writing for a social science audience are
also welcome contributors. To the extent possible,
we will try to make the journal cross-disciplinary
and transnational in scope.

We are inviting original papers in policy analysis,
policy modeling, policy surveys and synthesis,
institutional analysis, conceptual/theoretical papers,
case studies and case histories from academic and
non-academic experts in the natural resources and
environmental field.

We hope that you will consider *Journal of Natural
Resources Policy Research* as a future publication
to showcase your work and research.

Journal of Natural Resources Policy Research

We are looking for papers dealing with, but not limited to, the following topics

1. Natural resource policy broadly defined – scope and dimensions
2. Holistic vs. sector-specific approach
3. Policy framework – components, sequencing, linkages, integration, robustness
4. Conceptual/theoretical paradigms – rationale and evolutionary perspectives
5. Country studies, case studies, case histories, survey papers
6. Natural resource policy modeling
7. Natural resource institutions – design and implementation
8. Natural resource policy crafting – ownership, allocation, planning, development, markets and pricing, conservation
9. Natural resources and political externalities; public choice and rent-seeking
10. Natural resource use and environmental quality
11. Public-private partnership issues
12. Natural resources and institutional entropy
13. Transboundary, transnational, and transgenic resources
14. Natural resource policy - efficiency, equity, and sustainability
15. Trigger issues - climate change, natural disasters, human disasters, deforestation, endangered species, invasive species, environmental pollution

Please prepare your papers in accordance with the journal guidelines (please see www.tandf.co.uk/journals/JNRPR).

Thoughts on *Journal of Natural Resources Policy Research*:

"I share your belief that there is a need for a policy-focused interdisciplinary journal that cuts across natural resource management/problem domains. This is an exciting project likely to be of wide interest."

- Steven A. Wolf, Cornell University, New York, USA

"What a wonderful idea for a policy journal addressing natural resources...I wish you success in launching the Journal."

- Joanne Linnerooth-Bayer, International Institute for Applied Systems Analysis (IIASA), Austria

* Volume1 Issue1, free to view online. Limited time only 31.12.2009
