Call for Papers

Spatial Economic Analysis is a pioneering economics journal dedicated to the development of theory and methods in spatial economics. The journal is aimed at an international audience, but will be of interest to policy makers and practitioners.

The main aim of **Spatial Economic Analysis** is to set the highest academic standard and to become a world-class journal in its field. The journal is edited by an internationally recognised panel of economists.

The Editorial Board invites original submissions from economists, geographers, regional and social scientists, working within the fields of spatial, geographical and regional economics. The following subject areas are particularly welcome:

- The development, testing and application of theories of 'new economic geography'
- Theoretical, applied and policy orientated papers within the broad sphere of spatial economics
- Quantitative economic geography models, spatial econometrics, simulation modelling, multi-sectoral regional and CGE models, inter-regional migration modelling
- Quantitative policy evaluation, and applications of spatial data analysis, urban economics, the analysis of regional and international growth, global, international and local trade and investment, regional labour markets

Papers will be subject to refereeing at international standards, and will be evaluated by their contribution to knowledge, originality, and rigour.

About the Associations

For more information about the **Regional Studies Association** please visit: www.regional-studies-assoc.ac.uk or email: info@rsa-ls.ac.uk

For more information about the **Regional Science Association International** (British & Irish Section) please visit www.rsai-bis.org or email L.Juleff@napier.ac.uk

Submissions

Manuscripts are invited for submission. Submissions of articles should be between 7000-9000 words, inclusive of all notes and references.

To submit a paper to **Spatial Economic Analysis**:

1. Visit <http://mc.manuscriptcentral.com/rsea>
2. Create an account and navigate the simple steps
