International Journal for Computational Methods in Engineering Science and Mechanics

Editor-in-Chief:

J. N. Reddy

Department of Mechanical Engineering
Texas A&M University

This journal provides an interdisciplinary forum for papers dealing with mathematical models and computational methods and algorithms for the numerical simulation of natural processes arising in applied science and mechanics.

Special emphasis is placed on both upstream and applied research and on the transfer of technology to industry in the areas of fluid mechanics, heat transfer, solid and structural mechanics in the disciplines of aerospace, chemical, civil, mechanical, electrical engineering, and computational biology, chemistry, and materials science.

Also included are papers on novel computational methods to model current and emerging technologies in microelectromechanical systems, electromagnetics, biotechnology, nanotechnology, and information technology.

Electronic Submission

All manuscripts must be submitted electronically via <http://mc.manuscriptcentral.com/ucme>. This link allows easy submission of original and revised manuscripts and is used for all communication between authors, editors, and reviewers.
