B.M. Matthew, A.M. Middlebrook, T.B. Onasch,
[Collection Efficiencies in an Aerodyne Aerosol Mass Spectrometer as a Function of Particle Phase for Laboratory Generated Aerosols](#) Volume 42, Issue 11, pp. 884-898.

D.A. Lack, C.D. Cappa, D.S. Covert, et al., [Bias in Filter-Based Aerosol Light Absorption Measurements Due to Organic Aerosol Loading: Evidence from Ambient Measurements](#) Volume 42, Issue 12, pp. 1033-1041.

J.A. Huffman, P.J. Ziemann, J.T. Jayne, et al., [Development and Characterization of a Fast-Stepping/Scanning Thermodesorber for Chemically-Resolved Aerosol Volatility Measurements](#) Volume 42, Issue 5, pp. 395-407.

E. Nemitz, J.L. Jimenez, J.A. Huffman, et al., [An Eddy-Covariance System for the Measurement of Surface/Atmosphere Exchange Fluxes of Submicron Aerosol Chemical Species – First Application Above an Urban Area](#) Volume 42, Issue 8, pp.636-657.

K. Iida, M.R. Stolzenburg, P.H. McMurry, [Effect of Working Fluid on Sub-2 nm Particle Detection with a Laminar Flow Ultrafine Condensation Particle Counter](#) Volume 43, Issue 1, pp. 81-96.

M. Sipila, K. Lehtipalo, M. Attoui, et al., [Laboratory Verification of PH-CPC's Ability to Monitor Atmospheric Sub-3 nm Clusters](#) Volume 43, Issue 2, pp. 126-135.

A. Zelenyuk, J. Yang, E. Choi, et al., [SPLAT II: An Aircraft Compatible, Ultra-Sensitive, High Precision Instrument for In-Situ Characterization of the Size and Composition of Fine and Ultrafine Particles](#) Volume 43, Issue 5, pp. 411-424.

B.K. Ku, J.F. de la Mora, [Relation Between Electrical Mobility, Mass, and Size for Nanodrops 1-6.5 nm in Diameter in Air](#) Volume 43, Issue 3, pp. 241-249.

C.Y.H. Chao, M.P. Wan, G.N.S. To, [Transport and Removal of Expiratory Droplets in Hospital Ward Environment](#) Volume 42, Issue 5, pp. 377-394.

B. Giechaskiel, P. Dilara, J. Andersson, [Particle Measurement Programme \(PMP\) Light-Duty Inter-Laboratory Exercise: Repeatability and Reproducibility of the Particle Number Method](#) Volume 42, Issue 7, pp. 528-543
