Aerosol Research Letters

Aerosol Research Letters (ARL) are short papers that, in the Editors' and Reviewers' opinions, describe especially significant developments in our discipline. The bar for acceptance as an ARL article is high: no more than 10% of papers will fall in this category. Papers submitted as ARLs are prescreened by Editors to determine whether they should be sent out for review. Only the most novel and exciting work is considered and published rapidly. Aerosol Research Letters are freely available online immediately upon publication! Please see the list of ARLs below to link directly to current and groundbreaking research published in the most recent Aerosol Research Letters.

Rajan K. Chakrabarty, Hans Moosmüller, Mark A. Garro & Christopher B. Stipe Observation of Superaggregates from a Reversed Gravity Low-Sooting Flame Volume 46, Issue 1, pp. 1-3

Bin Zhao; Chun Chen; Alvin C. K. Lai Lagrangian Stochastic Particle Tracking: Further Discussion Volume 45, Issue 8, pp. 891-892

Jingkun Jiang; Jun Zhao; Modi Chen; Fred L. Eisele; Jacob Scheckman; Brent J. Williams; Chongai Kuang; Peter H. McMurry First Measurements of Neutral Atmospheric Cluster and 1–2 nm Particle Number Size Distributions During Nucleation Events Volume 45, Issue 4, pp. 1-5

Bogan, M. J., Boutet, S., Chapman, H. N., Marchesini, S., Barty, A., Benner, W., et al. Aerosol Imaging with a Soft X-Ray Free Electron Laser Volume 44, Issue 3, pp. 1-6

Lee, T., Sullivan, A. P., Mack, L., Jimenez, J. L., Kreidenweis, S. M., Onasch, T. B., et al. Chemical Smoke Marker Emissions During Flaming and Smoldering Phases of Laboratory Open Burning of Wildland Fuels Volume 44, Issue 9, pp. 1-5

Heinson, W. R., Sorensen, C. M. & Chakrabarti, A. Does Shape Anisotropy Control the Fractal Dimension in Diffusion-Limited Cluster-Cluster Aggregation? Volume 44, Issue 12, pp. 1-4.
