

The **Journal of Occupational and Environmental Hygiene** has a 2010 Impact Factor of 1.293!

Now you can read the most-cited articles from 2008-2010 for free.

© 2011 Thomson Reuters, *2010 Journals Citation Reports®*

P. Schulte, C. Geraci, R. Zumwalde, et al., [*Occupational Risk Management of Engineered Nanoparticles*](#) Volume 5, Issue 4, pp. 239-249.

D.M. Zalk, D.I. Nelson, [*History and Evolution of Control Banding: A Review*](#) Volume 5, Issue 5, pp. 330-346.

T.M. Peters, S. Elzey, R. Johnson, et al., [*Airborne Monitoring to Distinguish Engineered Nanomaterials from Incidental Particles for Environmental Health and Safety*](#) Volume 6, Issue 2, pp. 73-81.

M.M. Methner, L. Old, [*Effectiveness of Local Exhaust Ventilation \(LEV\) in Controlling Engineered Nanomaterial Emissions during Reactor Cleanout Operations*](#) Volume 5, Issue 6, pp. D63-D69.

M. Methner, L. Hodson, C. Geraci, [*Nanoparticle Emission Assessment Technique \(NEAT\) for the Identification and Measurement of Potential Inhalation Exposure to Engineered Nanomaterials - Part A*](#) Volume 7, Issue 3, pp.127-132.

S. Rengasamy, W.P. King, B.C. Eimer, et al., [*Filtration Performance of NIOSH-Approved N95 and P100 Filtering Facepiece Respirators against 4 to 30 Nanometer-Size Nanoparticles*](#) Volume 5, Issue 9, pp. 556-564.

M. Nicas, D. Best, [*A Study Quantifying the Hand-to-Face Contact Rate and Its Potential Application to Predicting Respiratory Tract Infection*](#) Volume 5, Issue 6, pp. 347-352.

M. Methner, L. Hodson, A. Dames, et al., [*Nanoparticle Emission Assessment Technique \(NEAT\) for the Identification and Measurement of Potential Inhalation Exposure to Engineered Nanomaterials-Part B: Results from 12 Field Studies*](#) Volume 7, Issue 3, pp. 163-176.

W.A. Heitbrink, D.E. Evans, B.K. Ku, et al., [*Relationships Among Particle Number, Surface Area, and Respirable Mass Concentrations in Automotive Engine Manufacturing*](#) Volume 6, Issue 1, pp. 19-31.

Y. Fujitani, T. Kobayashi, K. Arashidani, et al., [*Measurement of the Physical Properties of Aerosols in a Fullerene Factory for Inhalation Exposure Assessment*](#) Volume 5, Issue 6, pp. 380-389.
