## Top 10 Downloaded Papers in 2010

**Editor:**

**Professor Jeremy M. Hutson** - *University of Durham, UK*

### **Investigations of enzyme-catalysed reactions with combined quantum mechanics/molecular mechanics (QM/MM) methods**

*Kara E. Ranaghan & Adrian J. Mulholland* - Volume 29, Issue 1, 2010, pages 65-133

### **Shape and size dependence of radiative, non-radiative and photothermal properties of gold nanocrystals**

*Stephan Link & Mostafa A. El-Sayed* - Volume 19, Issue 3, 2000, pages 409-453

### **Imaging chemical reactions – 3D velocity mapping**

*A. I. Chichinin, K.-H. Gericke, S. Kauczok & C. Maul* - Volume 28, Issue 4, 2009, pages 607-680

### **Electronic structures of graphene edges and nanographene**

*Toshiaki Enoki, Yousuke Kobayashi & Ken-Ichi Fukui* - Volume 26, Issue 4, 2007, pages 609-645

### **Cavity ring-down spectroscopy: Experimental schemes and applications**

*Giel Berden, Rudy Peeters & Gerard Meijer* - Volume 19, Issue 4, 2000, pages 565-607

### **Spectroscopic studies of cold, gas-phase biomolecular ions**

*Thomas R. Rizzo, Jaime A. Stearns & Oleg V. Boyarkin* - Volume 28, Issue 3, 2009, pages 481-515

### **Dynamics simulations of atmospherically relevant molecular reactions**

*R. Benny Gerber & Jiri Sebek* - Volume 28, Issue 2, 2009, pages 207-222

### **Mechanism of charge transport in self-organizing organic materials**

*Ferdinand C. Grozema & Laurens D.A. Siebbeles* - Volume 27, Issue 1, 2008, pages 87-138

### **Magnetic exchange between metal ions with unquenched orbital angular momenta: Basic concepts and relevance to molecular magnetism**

*Andrei Pali, Boris Tsukerblat, Juan Modesto Clemente-Juan & Eugenio Coronado*  
Volume 29, Issue 1, 2010, pages 135-230

### **Electronic spectra of carbon chains and derivatives**

*Ramya Nagarajan & John P. Maier* - Volume 29, Issue 3, 2010, pages 521-554

\*free online access available until 31 December 2011
