ergonomics

Ergonomics, also known as human factors, is the scientific discipline that seeks to understand and improve human interactions with products, equipment, environments and systems. Drawing upon human biology, psychology, engineering and design, ergonomics aims to develop and apply knowledge and techniques to optimise system performance, whilst protecting the health, safety and well-being of individuals involved. The attention of ergonomics extends across work, leisure and other aspects of our daily lives.

The journal **Ergonomics** is an international multi-disciplinary refereed publication, with a 50 year tradition of disseminating high quality research. Original submissions, both theoretical and applied, are invited from across the subject, including physical, cognitive, organisational and environmental ergonomics. Papers reporting the findings of research from cognate disciplines are also welcome, where these contribute to understanding equipment, tasks, jobs, systems and environments and the corresponding needs, abilities and limitations of people.

Abstracting Information

Ergonomics is abstracted and indexed in: *BiographyInd*; *British Library Inside*, *Cambridge Scientific Abstracts*; *EBSCO Databases*; *Electronic Collections Online*; *Ergonomics Abstracts*; *H.V. Wilson Applied Science and Technology Index*; *ISI Current Contents® - Social & Behavioural Sciences*; *ISI Current Contents® - Engineering, Computing & Technology*; *ISI Science Citation Index®*; *ISI Social Sciences Citation Index®*; *MEDLINE®*; *New Jour*; *Occupational Safety and Health Database*; *OCLC ArticleFirst*; *PAIS International*; *PASCAL*; *PerAbs*; *PsycFIRST*; *PsycINFO*; *RECAL*; *Scopus™* and *Zetoc*.

Most Downloaded Articles from the 2006 Volume

- *Background to sitting at work: Research-based requirements for the design of work seats*
E. N. Corlett
- *The effects of lumbar massage on muscle fatigue, muscle oxygenation, low back discomfort, and driver performance during prolonged driving*
J. L. Durkin, A. Harvey, R. L. Hughson, J. P. Callaghan
- *Trunk muscle activity in different modes of carrying schoolbags*
R. R. E. Motmans, S. Tomlow, D. Vissers
- *Comparison of three computer office workstations offering forearm support: Impact on upper limb posture and muscle activation*
A. Delisle, C. Larivière, A. Plamondon, D. Imbeau
- *Different computer tasks affect the exposure of the upper extremity to biomechanical risk factors*
J. T. Dennerlein and P. W. Johnson
- *The ironies of vehicle feedback in car design*
G. H. Walker, N. A. Stanton, M. S. Young
- *Ergonomic design interventions – a case study involving portable ladders*
G. W. Shepherd, R. J. Kahler, J. Cross
- *Patient safety during medication administration: The influence of organizational and individual variables on unsafe work practices and medication errors*
G. J. Fogarty and C. M. Mckean

Online submission now available

Ergonomics now offers online submission via Manuscript central™, the number one tool for managing manuscripts through the peer review process. Author benefits include:

- Simple electronic submission of manuscripts, revisions and amendments
- Email communication with the Editorial Office
- Online reviewing
- Facility to track manuscript status online
- Technical support

All submissions must be made online at the **Ergonomics** Manuscript Central site at <http://mc.manuscriptcentral.com/terg>

New users will first need to create an account. Manuscripts should be created and submitted via the Author Centre using a standard word processing program, such as Microsoft Word.

EDITORIAL BOARD
