

Most Downloaded Articles from the 2006 Volume

1. *Structural e-bioinformatics and drug design*†, A. J. M. Carpy, N. Marchand-Geneste
(Volume 17 Number 1/February 2006)
2. *SAR and QSAR modelling of endocrine disruptors*, J. Devillers, N. Marchand-Geneste, A. Carpy; J. M. Porcher
(Volume 17 Number 4/August 2006)
3. *A conceptual framework for predicting the toxicity of reactive chemicals: modelling soft electrophilicity*, T. W. Schultz, R. E. Carlson, M. T. D. Cronin, J. L. M. Hermens, R. Johnson, P. J. O'Brien, D. W. Roberts, A. Siraki, K. B. Wallace, G. D. Veith
(Volume 17 Number 4/August 2006)
4. *Validation of a QSAR model for acute toxicity*†, M. Pavan, T. I. Netzeva, A. P. Worth
(Volume 17 Number 2/April 2006)
5. *A model validation and consensus building environment*, T. Abshear, G. M. Banik, M. L. D'Souza, K. Nedwed, C. Peng
(Volume 17 Number 3/June 2006)
6. *Computer-aided molecular design of highly potent HIV-1 RT inhibitors: 3D QSAR and molecular docking studies of efavirenz derivatives*, P. Pungpo, P. Saparpakorn, P. Wolschann, S. Hannongbua
(Volume 17 Number 4/August 2006)
7. *Metabolic activation of chemicals: in-silico simulation*†, O. Mekenyan, S. Dimitrov, N. Dimitrova, G. Dimitrova, T. Pavlov, G. Chankov, S. Kotov, K. Vasilev, R. Vasilev
(Volume 17 Number 1/February 2006)
8. *3D-QSAR study on heterocyclic topoisomerase II inhibitors using CoMSIA*†, B. Tekiner-Gulbas, O. Temiz-Arpaci, I. Yildiz, E. Aki-Sener, I. Yalcin
(Volume 17 Number 2/April 2006)
9. *Validation of counter propagation neural network models for predictive toxicology according to the OECD principles: a case study*, M. Vračko, V. Bandelj, P. Barbieri, E. Benfenati, Q. Chaudhry, M. Cronin, J. Devillers, A. Gallegos, G. Gini, P. Gramatica, C. Helma, P. Mazzatorta, D. Neagu, T. Netzeva, M. Pavan, G. Patlewicz, M. Randić, I. Tsakovska, A. Worth
(Volume 17 Number 3/June 2006)
10. *Prediction of estrogenicity: validation of a classification model*†, A. Gallegos Saliner, T. I. Netzeva, A. P. Worth
(Volume 17 Number 2/April 2006)
