

Most Downloaded Articles from the 2006 Volume

1. *Investigating the cellular response to nanofibrous materials by use of a multi-walled carbon nanotube model*, J. H. George, M. S. Shaffer, M. M. Stevens
(Volume 1 Number 1/March 2006)
2. *Reverse micelles used as templates: a new understanding in nanocrystal growth*, M. P. Pileni
(Volume 1 Number 1/March 2006)
3. *A low temperature synthesis of ZnS nanrods*, Steven Daniels, Paul Christian, Paul O'Brien
(Volume 1 Number 1/March 2006)
4. *Synthesis and self-assembly of gold nanoparticles using gemini surfactant as a phase transfer reagent and a stabilizer*, Jian Xu, Lihui Zhou, Honglai Liu, Ying Hu
(Volume 1 Number 1/March 2006)
5. *A simple atomic force microscopy method for the visualization of polar and non-polar parts in thin organic films*, A. Amy Yu, Peter R. Stone, Julie E. Norville, Michael Vaughn, Eden J. Pacsial, Barry D. Bruce, Marc Baldo, Francisco M. Raymo, Francesco Stellacci
(Volume 1 Number 1/March 2006)
6. *Platinum tungsten oxide (Pt-WO₃) nanoparticles: their preparation in glycol and electrocatalytic properties*, Kwok-Ying Tsang, Tung-Chun Lee, Jiawen Ren, Kwong-Yu Chan, Hengzhi Wang, Huanting Wang
(Volume 1 Number 1/March 2006)
7. *Electrospinning carbon nanotube polymer composite nanofibers*, Leslie Y. Yeo, James R. Friend
(Volume 1 Number 2/June 2006)
8. *Surfactant mediated assembly of gold nanowires on surfaces*, J. J. Boote, K. Critchley, S. D. Evans
(Volume 1 Number 2/June 2006)
9. *Light-emitting silicon-rich nitride systems and photonic structures*, L. Dal Negro, J. H. Yi, M. Hiltunen, J. Michel, L. C. Kimerling, S. Hamel, A. J. Williamson, G. Galli, T. -W. F. Chang, V. Sukhovatkin, E. H. Sargent
(Volume 1 Number 1/March 2006)
10. *Accurate velocity measurements of AFM-cantilever vibrations by Doppler interferometry*, José F. Portolés, Peter J. Cumpson, John Hedley, Stephanie Allen, Philip M. Williams, Saul J. B. Tandler
(Volume 1 Number 1/March 2006)
