

Most Downloaded Articles from the 2006 Volume

1. *Energy landscapes: calculating pathways and rates*, David J. Wales
(Volume 25 Number 1-2/January-June 2006)
2. *Infrared spectroscopy of helium nanodroplets: novel methods for physics and chemistry*, M. Y. Choi, G. E. Douberly, T. M. Falconer, W. K. Lewis, C. M. Lindsay, J. M. Merritt, P. L. Stiles, R. E. Miller
(Volume 25 Number 1-2/January-June 2006)
3. *Roger E Miller*, Tomas Baer, Jeremy M. Hutson, David J. Nesbitt, Giacinto Scoles
(Volume 25 Number 1-2/January-June 2006)
4. *Importance of long-range interactions in chemical reactions at cold and ultracold temperatures*, Philippe F. Weck, N. Balakrishnan
(Volume 25 Number 3/July-September 2006)
5. *R12 methods in explicit correlated molecular electronic structure theory*, Wim Klopper, Frederick R. Manby, Seiichiro Ten-No, Edward F. Valeev
(Volume 25 Number 3/July-September 2006)
6. *Biomolecule large-amplitude motion and salvation dynamics: modelling and probes from THz to X-rays*, David M. Leitner, Martina Havenith, Martin Gruebele
(Volume 25 Number 4/October-December 2006)
7. *Molecule formation in ultracold atomic gases*, Jeremy M. Hutson, Pavel Soldán
(Volume 25 Number 4/October-December 2006)
8. *The time-dependent quantum wave packet approach to the electronic ally nonadiabatic processes in chemical reactions*, Tian-Shu Chu, Yan Zhang, Ke-Li Han
(Volume 25 Number 1-2/January-June 2006)
9. *Crossed molecular beam reactive scattering: from simple traitomic to multichannel polyatomic reactions*, Nadia Balucani, Giovanni Capozza, Francesca Leonori, Enrico Segoloni, Piergiorgio Casavecchia
(Volume 25 Number 1-2/January-June 2006)
10. *Roger E. Miller: Publications*
(Volume 25 Number 1-2/January-June 2006)
