

**Corresponding Author should fully complete the form below. Each author is required complete Part C of this form. All forms should be faxed to Karen LaFontaine at (706)721-2119 at time of submission.**

**Part A. Authorship Certification**

All persons designated as authors should qualify for authorship. Each author should have sufficiently participated in the work to take public responsibility for the content. Credit for authorship should be based on substantial contributions to 1) conception, design, analysis, or interpretation of data, 2) drafting the article or revising it critically for important intellectual content, and on 3) final approval of the version to be published. Participation solely in the acquisition of funding or the collection of data does not justify authorship. Any part of an article critical to its main conclusions must be the responsibility of at least one author. Only those with key responsibility for the material in the article should be listed as authors; please state the role of each author. Others contributing to the work should be recognized in the Acknowledgment section.

As corresponding author of this manuscript I affirm that:

1. All authors have met authorship criteria listed above.
2. I had access to all data from the study, both what is reported and what is unreported, and complete freedom to direct its analysis and reporting, without influence, editorial direction, or censorship from any sponsors.
3. No employee of a sponsor not listed as an author was involved in the preparation of the manuscript.

**Part B. Legal/Ethical Statement**

As corresponding author of this manuscript, I certify that this manuscript:

1. Contains no unlawful statements and does not infringe on the civil rights of others
2. That any research of laboratory animals followed all institutional and national guidelines.
3. That institutional guidelines for any research on human subjects were followed and that the study conforms to the provisions of the Declaration of Helsinki. Any experimental investigation with human subjects reported in the manuscript was performed with informed consent and follow the guidelines required by the institution(s) with which all authors are affiliated. Patient anonymity was carefully protected.
4. All case reports have the patient's consent.
5. All clinical trials are reported in [clintrials.gov](http://clintrials.gov).
