

Tenure-track Position in Environmental Engineering

The Civil and Environmental Engineering Department of the USC Viterbi School of Engineering is seeking outstanding candidates for a tenure-track faculty position. Applicants should have interest in water quality issues, including treatment processes and the chemistry and microbiology of natural waters. Specific areas include, but are not limited to, chemistry, fate and biological availability of contaminants, transport phenomena, biofilms and remediation processes. Collaborative opportunities exist within the Viterbi School of Engineering and other departments and centers within USC, including the Department of Earth Sciences, the Department of Biological Sciences, and the Wrigley Center for Environmental Studies.

Applications must include a letter clearly indicating the area of specialization, a detailed curriculum vitae, a one-page statement on current and future research directions, and names of at least four professional references.

The USC Viterbi School of Engineering (VSoE) is among the top 10 Engineering Schools (US News & World Report). VSoE counts 170 faculty members including 26 members of the National Academy of Engineering, 7 Presidential Early Career Awards, and 45 Early Career Awards. VSoE research expenditures reach \$150 million annually. VSoE is home to the Information Sciences Institute (ISI), two National Science Foundation-funded Engineering Research Centers, the USC Stevens Institute for Technology Commercialization, and the Department of Homeland Security's first center of excellence (CREATE).
