

THE IES JOURNAL PART A: Civil & Structural Engineering

The IES Journal Part A: Civil & Structural Engineering provides a forum for the publication and rapid dissemination of original research and developments in civil and structural engineering. Papers cover a wide range of structural, geotechnical, water resources, environmental, and infrastructure engineering, including mathematical formulations, novel methods and solutions in construction techniques, experimental investigations and practical applications. State-of-the-art surveys, technical notes and discussions offer a focused, vibrant and timely communication tool for researchers and consultants. Drawing on the international resources of the Institution, the Journal maintains an international outlook whilst having a strong focus on primary research and development works from Asia.

New for 2008

Editor:

C.M. Wang - *National University of Singapore, Singapore*
email: cviewcm@nus.edu.sg

Supported by an International Editorial Advisory Board

The Institution of Engineers, Singapore (IES) is the premier engineering institute in Singapore and is an advisor to the Singapore Government on professional engineering matters.
