## Submissions

Online Submission now available.  
Authors wishing to submit an article to  
**Avian Pathology** should visit  
<http://mc.manuscriptcentral.com/cavp>

For further information please visit:  
[www.avianpathology.com](http://www.avianpathology.com)

**Avian Pathology** is ranked number 12 in the top 20 journals most cited within the Thomson Scientific (ISI) Essential Science Indicators Special Topic on Avian Influenza, and remains the **highest ranked journal in the avian sciences**.

**Avian Pathology** will consider original material relevant to the entire field of infectious and non-infectious diseases of poultry and all other birds, including infections that may be of zoonotic/food-borne importance. Subject areas include pathology; diagnosis; detection and characterisation of pathogens; gene sequences; epidemiology; immune responses; vaccines; genetics in relation to disease; and physiological and biochemical changes that are in response to disease. Manuscripts reporting cases of naturally occurring disease must describe either new diseases or give significant new information about previously known diseases. The information should significantly enhance knowledge and understanding of the disease or pathogen.

Papers on food-borne microorganisms acquired during or after processing are not appropriate. Manuscripts describing the occurrence or morphology of unicellular eukaryotes and multicellular organisms, or which are essentially catalogues of micro-organisms detected, are unlikely to be considered for publication unless they have a clear relationship to disease. First and subsequent reports of occurrence within a country of diseases well-recognized elsewhere will not be accepted unless they also include significant new information about the disease or pathogen. Manuscripts should report novel findings that are of interest to an international readership.

**Taylor & Francis**  
Taylor & Francis Group

## Recent and Forthcoming Articles

- Molecular evaluation of responses to vaccination and challenge by Marek's disease viruses  
**Jianming Tan, Julie Cooke, Nadeene Clarke and Gregory Tannock**
- Pivotal role of ChIFN in the pathogenesis and immunosuppression of infectious bursal disease  
**Fabienne Rauw, Bénédicte Lambrecht and Thierry van den Berg**
- A field study on the significance of vaccination against infectious bursal disease virus (IBDV) at the optimal time point in broiler flocks with maternally derived IBDV antibodies  
**Hermann Block, Karen Meyer-Block, Dierk Rebeski, Heike Scharr, Sjaak de Wit, Karl Rohn and Silke Rautenschlein**
- Avian reovirus-induced apoptosis related to tissue injury  
**Hsin Lin, Sue Chuang, Yu Chen, Wen Shih, Ching Chang and Hung Liu**
- Coronaviruses in poultry and other birds  
**Dave Cavanagh**
- Vaccination of chickens against H5N1 avian influenza in the face of an outbreak interrupts virus transmission  
**Trevor M. Ellis, Connie Y. H. C. Leung, Mary K. W. Chow, Lucy A. Bissett, William Wong, Yi Guan and J. S. Malik Peiris**
