

Geophysical & Astrophysical Fluid Dynamics – Most Downloaded Articles from 2004

1. Martha Evonuk and Gary A. Glatzmaier
2D studies of various approximations used for modeling convection in giant planets
(Taken from Volume 98/Number 3/June 2004)
2. Eun-jin Kim, David W. Hughes, Andrew M. Soward
A nonlinear dynamo driven by rapidly rotating convection
(Taken from Volume 98/Number 4/August 2004)
3. Jan Bert Flor, John W.M. Bush, Marius Ungarish
An experimental investigation of spin-up from rest of a stratified fluid
(Taken from Volume 98/Number 4/August 2004)
4. Ashley P. Willis and David Gubbins
Kinematic dynamo action in a sphere: Effects of periodic time-dependent flows on solutions with axial dipole symmetry
(Taken from Volume 98/Number 6/December 2004)
5. P. D. Williams, P. L. Read, T. W. N. Haine
A calibrated, non-invasive method for measuring the internal interface height field at high resolution in the rotating, two-layer annulus
(Taken from Volume 98/Number 6/December 2004)
6. P. Caillol and R. Grimshaw
Steady multipolar planar vortices with nonlinear critical layers
(Taken from Volume 98/Number 6/December 2004)
7. Sanjeeva Balasuriya
An analytical study of general hyper-diffusivity and barotropic eddies
(Taken from Volume 98/Number 1/February 2004)
8. Joseph A. Biello and Andrew J. Majda
Boundary layer dissipation and the nonlinear interaction of equatorial baroclinic and barotropic rossby waves
(Taken from Volume 98/Number 2/April 2004)
9. F. M. Al-Shamali, M. H. Heimpel, J. M. Aurnou
Varying the spherical shell geometry in rotating thermal convection
(Taken from Volume 98/Number 2/April 2004)
10. J. Wells and Ya. D. Afanasyev
Decaying quasi-two-dimensional turbulence in a rectangular container: laboratory experiments
(Taken from Volume 98/Number 1/February 2004)
