

# Molecular Physics

## Most Downloaded Articles from the 2007 Volume

1. [Educational aspects of molecular simulation](#)  
Allen, Michael P.  
(Volume 105 Issue 2)
2. [Water, proton, and ion transport: from nanotubes to proteins](#)  
Hummer, Gerhard  
(Volume 105 Issue 2)
3. [Emerging methods for multiscale simulation of biomolecular systems](#)  
Chu, J. -W., Ayton, G. S., Izvekov, S., Voth, G. A.  
(Volume 105 Issue 2)
4. [Atomistic modelling of the interaction between peptides and carbon nanotubes](#)  
Tomásio, S. De Miranda, Walsh, T. R.  
(Volume 105 Issue 2)
5. [Unravelling the solvent response to neutral and charged solutes](#)  
Kornyshev, Alexei A., Fedorov, Maxim V.  
(Volume 105 Issue 1)
6. [Ab initio molecular dynamics study of ascorbic acid in aqueous solution](#)  
Costanzo, F., Sulpizi, M., Vandevondele, J., Della Valle, R. G., Sprik, M.  
(Volume 105 Issue 1)
7. [Modelling nucleation and nano-particle structures](#)  
Mora-Fonz, M. J., Hamad, S., Catlow, C. R. A.  
(Volume 105 Issue 2)
8. [Atomic scale design of nanostructures](#)  
Bernholc, J., Lu, W., Nakhmanson, S. M., Hahn, P. H., Meunier, V., Nardelli, M. Buongiorno, Schmidt, W. G.  
(Volume 105 Issue 2)
9. [Simple off-lattice model to study the folding and aggregation of peptides](#)  
Combe, Nicolas, Frenkel, Daan  
(Volume 105 Issue 4)
10. [Spatial correlation of dipole fluctuations in liquid water](#)  
McGrath, M. J., Siepmann, J. I., Kuo, I. -F. W., Mundy, C. J.  
(Volume 105 Issue 10)
