

Molecular Physics

Most Downloaded Articles from the 2008 Volume

1. [Fortran codes for the correlation functions of hard sphere fluids](#)
Smith, W. R., Henderson, D. J., Barker, J. A., Grundke, E. W., Leonard, P. J.
(Volume 106 Issue 1)
2. [Thermodynamics of a long-range triangle-well fluid](#)
Betancourt-Cárdenas, F. F., Galicia-Luna, L. A., Benavides, A. L., Ramírez, J. A., Schöll-Paschinger, E.
(Volume 106 Issue 1)
3. [Many-body Brillouin–Wigner second-order perturbation theory: an application to the autoaromatisation of hex-3-ene-1,5-diyne \(the Bergman reaction\)](#)
Papp, P., Neogrady, P., Mach, P., Pittner, J., Hubač, I., Wilson, S.
(Volume 106 Issue 1)
4. [Conformational and microwave dielectric relaxation studies of hydrogen bonded polar binary mixtures of propionaldehyde with isopropyl amine](#)
Vishwam, T., Subramanian, V., Subbaiah, D. V., Murthy, V. R. K.
(Volume 106 Issue 1)
5. [An equation of state contribution for dipolar and quadrupolar square-well fluids](#)
Alavi, F., Feyzi, F.
(Volume 106 Issue 1)
6. [Ab initio potential energy curve for the neon atom pair and thermophysical properties of the dilute neon gas. I. Neon–neon interatomic potential and rovibrational spectra](#)
Hellmann, R., Bich, E., Vogel, E.
(Volume 106 Issue 1)
7. [Quantitative quantum chemistry](#)
Tew, D. P., Klopper, W., Helgaker, T.
(Volume 106 Issue 16)
8. [A flexible atomic and polarizable potential for water Application to small clusters](#)
Lussetti, E., Pastore, G., Smargiassi, E.
(Volume 106 Issue 1)
9. [Editorial Reprinted from Volume 1, Issue 1, 1958](#)
Longuet-Higgins, H. C., van der Waals, J. H.
(Volume 106 Issue 16)
10. [Simulations of phase transitions and free energies for ionic systems](#)
Hynninen, A.-P., Panagiotopoulos, A. Z.
(Volume 106 Issue 16)
