

PRESS RELEASE

Taylor & Francis Group achieves impressive growth in the annual Journal Citation Reports®

Oxford, UK, 10th July, 2008 –Taylor & Francis, Routledge, and Psychology Press have increased the number of titles listed in Thomson Reuter's 2007 *Journal Citation Reports*® by over 10% compared to 2006. Taylor & Francis Group and sister imprint Informa Healthcare now publish over 625 titles listed in Web of Science: 595 titles listed in the *Journal Citation Reports*® (JCRs) or due for listing in forthcoming editions, plus over 30 titles listed in the *Arts & Humanities Citation Index*®.

The impressive growth of Taylor & Francis Group journals is reflected in an 11% increase in total citations to titles listed in both 2006 and 2007 compared to a 9% growth in citations across all titles in the JCRs.

Taylor & Francis now publishes the top ranked title in 15 categories, including Urban Studies, Mathematical Methods, Food Science & Technology, Cybernetics, Ethnic Studies, Ethics, Instruments & Instrumentation and History & Philosophy of Sciences.

Having achieved top ranking in 5 categories and an increase in impact factor to 3.934, Glenn McGee, Editor of *American Journal of Bioethics* commented, "We are now the number one ranked Health Services Research Journal ... and the journal of record for bioethics, a super fast growing and highly utilized area for students and faculty in all sorts of fields".

David Sawicki, Editor of *JAPA*, the Journal of the American Planning Association, was equally delighted that the journal has become the top ranked journal in the Urban Studies category, "I am very pleased that *JAPA* has achieved this level of performance—all the more so because we have not worked for a high test grade, but rather, have stuck with the fundamentals. We have 16 terrific associate editors and a talented editorial board. Authors, referees, editors (especially our managing editor) and publisher, are the 'village' it takes to make a *JAPA* paper."

More than 150 Taylor & Francis and Informa Healthcare journals increased their Impact Factor by 25% or higher, including the following which increased by 50% or more, *Communication Monographs*, *Ethnic and Racial Studies*, *Regional Studies*, *Cognition and Instruction*, *Australian Journal of Psychology*, *Survival*, *Ozone: Science and Engineering*, *Critical Reviews in Analytical Chemistry*, *Critical Reviews in Environmental Science and Technology*, *Soft Materials*, *Ergonomics* and *Journal of Gender Studies*.

Twenty-three Taylor & Francis journals gained an Impact Factor for the first time, including *Journal of Experimental Nanoscience* (covered from Volume 1), *Gender, Place & Culture*, *Computer Methods in Biomechanics & Bio Engineering*, *Econometric Reviews*, *Mineral Processing and Extractive Metallurgy Review*, *European Journal of Work & Organisational Psychology*, *Journal of Energetic Materials*, *Journal of Biopharmaceutical Statistics*, and *Journal of Applied Animal Welfare Science*. A further 35 journals have been accepted for coverage in Web of Science® and listing in forthcoming *Journal Citation Reports*®.

Dr David Green, Global Journals Publishing Director comments: "The above-average increase in number of journals covered, and the impressive growth in number of total citations, together demonstrate the value attached to our publications by the global research community."

About Taylor & Francis, Routledge, and Psychology Press

Taylor & Francis, Routledge, and Psychology Press are part of Informa plc, one of the world's leading publishers of academic journals. The Taylor & Francis Group is dedicated to the dissemination of scholarly information, drawing on expertise developed since first publishing learned journals in 1798. The group now publishes nearly 1400 scholarly journals in association with 350 learned societies and scholarly institutions and operates from a network of 20 global offices, including Philadelphia, Oxford, Hove, Melbourne, Stockholm, Beijing, Tokyo, Johannesburg, New Delhi and Singapore.
