

## **Leading Information Security Journal Introduces a New Editor and Title**

*Information Systems Security* is proud to begin its 17<sup>th</sup> volume year with the dual announcement of a new editor and a title change. The journal is the official publication of (ISC) <sup>2</sup>, the non-profit global leader in educating and certifying information security professionals throughout their careers.

Beginning in 2008, Dr. Kamesh Namuduri, CISSP, will be the new editor of the journal. Dr. Namuduri has twenty years of combined academic and industry experience in information technology. This includes eight years in information assurance and security as well as presentations of his research work in fifty international conferences. He received a doctoral degree in Computer Science and Engineering from the University of South Florida in 1992 and holds several professional certifications including the Certified Information Systems Security Professional (CISSP), Certified Information Security Auditor (CISA), and Certified Information Security Manager (CISM). Dr. Namuduri is currently an Assistant Professor in the Electrical and Computer Engineering Department at Wichita State University.

The journal also opens the new year with a new title. Beginning with the first issue of 2008, *Information Systems Security* will change its title to the *Information Security Journal: A Global Perspective*.

*Information Security Journal: A Global Perspective* is a highly influential insider's publication dealing with the ever-changing security environment and its inherent challenges. It provides essential information for managing the evolving enterprise, with detailed, peer-reviewed articles on emerging technologies, current trends, and innovative solutions. Published bimonthly by Taylor & Francis on behalf of (ISC) <sup>2</sup>, the journal's audience is comprised of dedicated professionals charged with implementing security programs, as well as those who create and enforce policies and procedures. It is also made up of authors who are experts in their respective areas, submitting timely and visionary perspectives on information security.

Topics addressed in the journal include:

Analysis and Monitoring  
Business Continuity and Disaster Recovery  
Certification and Accreditation  
Continuity of Operations Planning (COOP)  
Cryptography  
Enterprise-wide System Development Security  
Information Security and Risk Management  
Laws, Investigations, Forensics and Ethics  
Security Architecture and Design  
Systems Security Engineering  
Telecommunications and Network Security

In order to safeguard our cyber infrastructure, security professionals need to be several steps ahead of hackers,” says Dr. Namuduri. “*Information Security Journal: A Global Perspective* provides a wealth of knowledge to academic researchers and practitioners alike and keeps them up-to-date with the current and future trends in the ever-changing information security field.”

Founded in 1989, (ISC) <sup>2</sup> has certified over 57,000 information security professionals in 135 countries. More information is available at [www.isc2.org](http://www.isc2.org).
