

Taylor & Francis Opens Access with new OA Program!

Oxford, 6th December 2011

The New Year sees the launch of an exciting range of Open Access options from Taylor & Francis via the **Taylor & Francis Open** program. This new initiative is designed to give authors and their sponsors flexibility and variety when they choose to publish research with Taylor & Francis.

The **Taylor & Francis Open** program is a suite of fully Open Access journals consisting of brand new titles, dynamic titles from T&F's existing portfolio which are converting to OA, and titles published on behalf of the Royal Society of New Zealand and the Human Sciences Research Council, South Africa. Many of the titles in this program will collaborate with leading journals within T&F's existing portfolio, providing input and support from learned societies and internationally-acclaimed editors to ensure their calibre.

Taylor & Francis Open journals will have affordable article publication fees, with discounts or fee waivers for emergent countries. Authors will benefit from rapid online publication, rigorous peer review and the high levels of customer care Taylor & Francis provides to all authors. Their finished article will be showcased on Taylor & Francis Online, helping them to gain recognition and esteem for their contribution to their field.

Taylor & Francis can confirm the following titles will be included in **Taylor & Francis Open**, with more to join in the New Year:

Complex Metals

Green Chemistry Letters and Reviews

International Journal of Smart and Nano Materials

Journal of Biological Dynamics

Journal of Organic Semiconductors

Kotuitui: New Zealand Journal of Social Sciences Online - published on behalf of the **Royal Society of New Zealand**

Nanoscience Methods

SAHARA-J: Journal of Social Aspects of HIV/AIDS, published on behalf of the **Human Sciences Research Council**

Systems Science & Control Engineering

Dr David Green, Global Journals Publishing Director, sums up Taylor & Francis' new approaches to Open Access, "Taylor & Francis is committed to producing high-calibre journals that showcase quality global research. We believe that this content should be widely disseminated and are now exploring various Open Access models to enable universal access in ways that are sustainable and meet the needs of the academic and research communities. Over the past three years society journals have been partnering with Taylor & Francis Group at the rate of more than one per week, and, if required, we are now able to offer a potential partner a range of Open Access models".

Taylor & Francis will also continue to offer **Taylor & Francis Open Select**, which is a hybrid program giving authors the choice to publish on an Open Access basis in over 500 titles from across Taylor & Francis Group's extensive portfolio.

About Taylor & Francis Group

Taylor & Francis Group partners with researchers, scholarly societies, universities and libraries worldwide to bring knowledge to life. As one of the world's leading publishers of scholarly journals, books, ebooks and reference works our content spans all areas of Humanities, Social Sciences, Science and Technology.

From our network of offices in Oxford, Philadelphia, Melbourne, Singapore, Beijing, Tokyo, Stockholm, New Delhi and Johannesburg, Taylor & Francis staff provide local expertise and support to our editors, societies and authors and tailored, efficient customer service to our library colleagues.
