

Taylor & Francis Standard Reference Style | NLM

National Library of Medicine (NLM) is a member of the National Information Standards Organization and its various published standards have been adopted for the Library's MEDLINE/PubMed database. See <https://www.nlm.nih.gov/citingmedicine/> for complete guidance, including less frequently used reference types. Please note that Taylor & Francis does not require the inclusion of all optional elements, so you should match the samples below.

If you are using this reference style the EndNote output style can be found at <http://endnote.com/downloads/style/tf-standard-nlm>

In the text	
Placement	<p>References are numbered consecutively in the order in which they are first mentioned in the text. Identify references in text, tables, and captions by bracketed numbers [1], and provide a list of references at the end of the article in numerical order with square brackets around the numbers. Reuse the original number assigned to the reference each time a reference is repeated in the text.</p> <p>Insert the citation numbers at the relevant place in the text, inside any adjacent punctuation mark. Examples:</p> <p>Myopathy typically occurs in fewer than one in 10,000 patients on standard doses [1].</p> <p>This approach was successfully implemented by Benders et al. [30] and Zhao [31] for modular NN.</p> <p>For this purpose, the NNs were widely used in structural inverse problems [24], damage identification [14,25], or parameters estimation [26], among many applications.</p>
Multiple references	<p>When citing multiple references, use commas (without spaces) to separate them. Use an unspaced en dash to join inclusive first and last numbers, e.g. [2,3,4,5,7,10] would be abbreviated to [2–5,7,10]. Examples:</p> <p>Compared to the initial shape, the optimized surface shape can substantially improve the structural characteristics [12,13].</p> <p>Most of the optimization methods proposed in previous studies are parametric methods [3–7].</p> <p>See, for example, [1,3,10–13,15–20,22–25,27,28].</p> <p>For some work along these lines, see [3,13,17,18,27].</p> <p>The crack boundary was discretized using 10 discontinuous quadratic elements, where the crack-tip elements are discontinuous quarter-point [see 17,28].</p>
Reference citing author name(s) in the text	<p>Give a number even if the author is named in the text:</p> <p>Jones [10] has argued that ...</p> <p>Jones and Smith [12] have argued that ...</p> <p>If you want to name more than two authors in the text, use:</p> <p>Jones et al. [3] have argued that ...</p>
Repeat mentions in the same paragraph	<p>Other efforts are including the perturbation method described in [8,11,12,16] and the perturbation method described in [11,15].</p>
Page number	<p>Jones [10,p.23–27] states that ...</p> <p>Note that page numbers in the text are different from those in the reference list, with no space before or after the page number. Do not elide page number ranges. Use an unspaced en dash between page numbers.</p>

Warning | Not controlled when printed

	In the text and in the reference list NLM uses p. rather than pp.
With a quotation	Author maintains that “This is author’s quoted text” [1,p.3].
Personal communication	References to personal communications are cited only in the text. ... and most of these proved to be fatal (2003 letter from RS Grant to me; unreferenced, see “Notes”) ...

Tables and figures

Table and figure captions	References cited only in tables or figure captions should be numbered in accordance with the sequence established by the first identification in the text of the particular table or figure.
----------------------------------	--

Reference list

Order	Numerical order based on first appearance in the text.
Form of author name	Surname and initials. Capitalize surnames and enter spaces within surnames as they appear in the document you are citing, e.g. Van Der Horn <i>or</i> van der Horn; De Wolf <i>or</i> de Wolf <i>or</i> DeWolf. Initials follow surname without punctuation, without spaces or full points between initials, e.g. Author AA. Place family designations of rank after the initials, without punctuation, e.g. Author AA Jr. See http://www.ncbi.nlm.nih.gov/books/NBK7282/ for further guidance.

Journal

Journal titles	Journal titles are abbreviated according to ISO 4. See http://www.issn.org/services/online-services/access-to-the-ltwa/ Journal title abbreviations should not include full points, except at the end of the title; see examples below. Do not abbreviate journal titles consisting of a single word.
Issue numbers	The month is omitted if the journal is continuously paginated throughout the volume. The issue number can be omitted if the journal is paginated consecutively through the volume, but it is not incorrect to include it.
DOIs	There is no need to include the DOI numbers for published articles; they will be added as links in any online version of the article during the production process.
Basic format (with one author)	Author AA. Title of article. Abbreviated Journal Title. Date;volume(number):pages. MacGregor RJ. A functional view of consciousness and its relations in

	brain. <i>J Integr Neurosci</i> . 2004;3(3):253–266.
Two authors	Prokai-Tatrai K, Prokai L. Modifying peptide properties by prodrug design for enhanced transport into the CNS. <i>Prog Drug Res</i> . 2003;61:155–188.
Three authors	Veronesi U, Maisonneuve P, Decensi A. Tamoxifen: an enduring star. <i>J Natl Cancer Inst</i> . 2007;99(4):258–260.
More than three authors	Meneton P, Jeunemaitre X, de Wardener HE, et al. Links between dietary salt intake, renal salt handling, blood pressure, and cardiovascular diseases. <i>Physiol Rev</i> . 2005;85:679–715.
Organization as author	American Diabetes Association. Diabetes update. <i>Nursing</i> . 2003 Nov;Suppl:19–20, 24.
No author	Pelvic floor exercise can reduce stress incontinence. <i>Health News</i> . 2005;11(4):11.
Not in English	Translate non-English titles into English where possible; place the translation in square brackets. Place the original language title or romanized title before the translation. Capitalize only the first word of the title, proper nouns, proper adjectives, acronyms, and initialisms unless the conventions of a particular language require other capitalization. Indicate the language after the pagination: Berrino F, Gatta G, Crosignani P. [Case-control evaluation of screening efficacy]. <i>Epidemiol Prev</i> . 2004;28:354–359. Italian. Wilkniss SM, Hunter RH, Silverstein SM. Traitement multimodal de l'agressivité et de la violence chez des personnes souffrant de psychose [Multimodal treatment of aggression and violence in individuals with psychosis]. <i>Santé Ment Que</i> . 2004 Autumn;29(2):143–174. French.
Article published online only or online ahead of placement in an issue	Include any date of update or revision and a date of citation in square brackets following the date of publication. Use the dates for the individual journal article being cited. If the location (pagination) of the article is not provided, provide the DOI or URL of the article. Do not include a full point at the end of DOI or URL addresses. Author B. Title of article. Abbreviated Journal Title. Year [cited date]; [page length]. DOI:00.0000
Not the Version of Record (including Author Manuscript Online, Advanced Author Version, etc.)	Author AA. Article title. Abbreviated Journal Title. Forthcoming. [cited Date]:[pages]. [Format] available at [URL or DOI] Zheng H, Ng F, Liu Y, et al. Spatial and circadian regulation of <i>cry</i> in <i>Drosophila</i> . <i>J Biol Rhythms</i> . Forthcoming. [cited 2008 Aug 11]:[18 p.]. Author's manuscript available at http://www.pubmedcentral.nih.gov/articlerender.fcgi?tool=pubmed&pubmedid=18663236 PubMed Central; PMID: PMC2504742.
Supplementary	If a journal article has supplemental material accompanying it in the form of

Warning | Not controlled when printed

material	a CD-ROM, DVD, or other medium, begin by citing the article. Add the phrase "Accompanied by:" followed by a description of the medium. Author AH. Article title. Abbreviated Journal Title. Date;volume(number):pages. Accompanied by: Video on CD-ROM.
Article type	An article type alerts the user that the reference is to something other than a full article. Place, e.g., [abstract], [book review] or [letter] after the article title: Author K. Article title [book review]. Abbreviated Journal Title. Date;volume(number):pages.
Book	
Place of publication	Always list the town or city, and always include the two-letter state abbreviation for US and Canadian cities. Include the country name for other countries only to avoid ambiguity: Cambridge (MA) Cambridge (UK) If more than one place of publication is found, use the first listed place of publication. If no place of publication can be found but can be reasonably inferred, enclose it in square brackets, e.g. [Chicago (IL)]. If no place of publication can be found or inferred, use [place unknown].
Publisher	Abbreviate well-known publisher names, e.g. John Wiley & Sons, Ltd. may become simply Wiley. If no publisher can be determined, use the words "publisher unknown" enclosed in square brackets.
Page numbers	Note that page numbers in the reference list are different from those in the text, with a space before the page number. Do not elide page number ranges. Use an unspaced en dash between page numbers. In the text and in the reference list NLM uses p. rather than pp.
