Note

This list presents, in chronological order, all items published in the journal *ROLSI*. The list makes it easier to find specific items, or to track and search for authors, analytic interests and phenomena, settings and situations, or data languages, etc. The list begins at 1987, when the journal changed its name and orientation, after starting in 1969 as *Papers in Linguistics*.

I compiled the bibliography from details at the publisher (*Taylor & Francis*) website, at <http://www.tandfonline.com/loi/hrls20#.UpkHqcQW2So>. I corrected some errors (e.g. spelling/order of contributor names, incorrect and lost typographical detail), removed excess information, and re-formatted and tidied for consistency. The aim was that entries here match the content and formatting of the actual published papers, although I used consistent capitalisation across the list. I also more clearly indicated some Special Issues and Sections. Sometimes the title of the issue/section was not clearly stated, so I determined this from the guest editor introduction paper. Otherwise, I preserved throughout the publisher's website headings.

If you notice any errors or absences please feel free to contact me so I can correct. I will aim to update the Bibliography annually.
